FREQUENTLY ASKED QUESTIONS DURING THE QUARTER

What were the main reasons behind upgraded guidance?

Kemira has had a good start to the year. Kemira's end-market demand has continued to be good and Kemira expects the demand to remain good for the rest of 2022. The strong inflationary environment has continued, but Kemira has taken successful actions to mitigate the impact. Kemira started the mitigation actions already in early 2021.

Was Kemira impacted by the stoppage of Russian gas to Finland?

Kemira does not really use natural gas in its facilities in Finland. In certain sites in Finland, we use liquified natural gas. Overall, there has been no real direct impact after Russia stopped gas deliveries to Finland. It could have an impact on Kemira indirectly via customers and suppliers, but so far impact has been limited.

How is Kemira prepared for possible natural gas disruptions in Europe?

Some of Kemira's facilities in Continental Europe use natural gas and the share of Russian gas varies by facility. Only a few of our European sites use natural gas in production, mostly gas is used for heat and steam. We are in active discussions with local authorities should there be gas shortages, and we are preparing for various scenarios. The largest impact of possible gas shortages is expected to come via Kemira's customers and suppliers.

INVESTOR ACTIVITIES AND EVENTS DURING Q2 2022

Kemira had physical investor roadshows in London, Brussels and the Netherlands, one virtual group meeting for Helsinki based investors and individual calls with US-based investors during Q2 2022. In June, Kemira organized a site visit together with Metsä Board to Simpele and Joutseno for the

Kemira

companies' sell-side analysts. In addition, Kemira hosted a visit to its Espoo R&D Center and also hosted a pre-silent lunch and call for sell-side analysts following Kemira in June.
